Hi Blake and Steve,

I wanted to follow up with ADH regarding the CCRs for 2013 and I have received the following information regarding the Crossett area.

Crossett 017 = Has not submitted paperwork that ADH requested for ADH to create their CCR for 2013.

North Crossett 022 = System ran the CCR in their local newspaper and it is on the ADH website. They did not notify their customers that the CCR is on the ADH website.

Northeastern Crossett 023 = System mailed their CCR out and it on the ADH website. They did not notify their customers that the CCR is on the ADH website.

West Ashley 878 = System distributed the CCR via mail and electronic media.

Jatin

Steve, I can't say for sure.

I have copies of past CCRs that have reportedly been distributed or made available to the Crossett public water system consumers. The CCRs are due in June, so citizens should be receiving them in the weeks ahead, for calendar year 2013 drinking water compliance. It is important to note that CCRs may now be delivered electronically, say via email, or made available on a web site for download.

...my staff thinks the community may not be receiving them. Do you know?

thanks
